Donato Gómez

iOS Developer · Swift · SwiftUI · Swift Concurrency · Clean Architecture

Murcia, Spain · Remote · donatogomez.dev@gmail.com · linkedin.com/in/donatogomez · github.com/donatogomez · donatogomez.dev

PROFILE

iOS developer with 3+ years building and evolving production apps for the Government of Andalusia, Ferrovial, PRISA (Los40), Renfe and Vodafone, from greenfield development to ongoing evolution. I have owned an enterprise app's iOS development end to end as its sole iOS developer, and I design, ship and maintain an app on the App Store. Specialized in Swift, SwiftUI, clean architecture and modern concurrency (Swift 6, actors), with testing and CI, and AI-assisted development guided by sound architecture.

TECHNICAL SKILLS

Swift · SwiftUI · Swift Concurrency (async/await, actors, Sendable) · MVVM · Clean Architecture · Swift Package Manager · URLSession / REST · SwiftData · Swift Testing · XCTest · Git · GitHub Actions · App Store Connect / TestFlight · AVFoundation · CarPlay · App Intents · WidgetKit · watchOS · Scrum

EXPERIENCE

iOS Developer — NTT DATA

Jul 2022 – Sep 2025 · Remote

- **Ferrovial:** sole owner of the iOS development of an internal incident-management app, from scratch to delivery in ~3 months. I defined the architecture and stack (SwiftUI, async/await) and the UX/UI design, later adopted by the Android version, and integrated authentication through the Salesforce SDK and the client's proprietary mapping system.
- **Government of Andalusia (Carpeta Ciudadana):** I analysed the legacy app (~90% Objective-C; it did not build) and documented the deep-refactoring and rebuild alternatives in a technical report; the app was subsequently rebuilt from scratch. I took part in the rebuild in SwiftUI with Clean Architecture and MVVM (v2.0, June 2024), a citizen app rated 4.7★ on the App Store, and in its subsequent releases.
- **PRISA (Los40):** rebuilt the app's main screen in SwiftUI together with another developer, using Clean Architecture + MVVM, async/await and REST APIs.
- **Renfe (dōcō) and Vodafone:** production bug fixing on dōcō (SwiftUI), plus some enhancements, and on Vodafone's app (UIKit, CocoaPods), where I also wrote tests.

Stack: Swift, SwiftUI, UIKit, MVVM, Clean Architecture, async/await, REST, CocoaPods, Git, Scrum.

iOS Developer — ZonaSalsa & independent projects

Sep 2025 – present · Remote

- **ZonaSalsa:** the official app of a 24/7 radio station, live on the App Store. I designed, built and shipped it, and maintain it on my own. Background live streaming (AVFoundation), Lock Screen and Control Center, CarPlay, Siri (App Intents) and sharing to Stories. Swift 6 strict concurrency, layered architecture and ~300 Swift Testing tests. Also Android and web versions.
- **SignalFlow (public on GitHub):** IoT fleet-monitoring app with Clean Architecture across ~23 SPM modules with CI-enforced boundaries, SwiftData in a ModelActor, on-device Foundation Models, widgets, a Live Activity and an Apple Watch app; ~230 Swift Testing tests and GitHub Actions.
- **Spec-driven, AI-assisted development (OpenSpec, ADRs):** I own the architecture and module boundaries, validate the specs and review every change before merging.

Android Developer — Green IT Globe / GIG Technology (Belgium)

Nov 2016 – Jul 2017

Native Android development (Java) in an international, English-speaking team. Earlier: banking support at VIEWNEXT (Almería, 2016) and an Erasmus+ Android internship at Mobicage (Belgium, 2016).

EDUCATION

- Swift Developer Program (Swift 6 & SwiftUI) — Apple Coding Academy (Oct 2024 – Feb 2025)
- Full Stack Mobile Developer Bootcamp — KeepCoding (2021–2022)
- Higher Vocational Diploma in Multiplatform Application Development (DAM) (2014–2018)
- Higher Vocational Diploma in Network Systems Administration (ASIR) (2012–2014)
- Professional Scrum Master I (PSM I) — Scrum.org (2023)

LANGUAGES

Spanish: native · English: C1, professional working proficiency (daily work in English in Belgium)
